21 DEC 1967

25X1A

Thank you for your letter of 28 November inquiring about the possibility of your company being utilized on our programs.

From the brochure which you provided, it appears that primary emphasis in your organization is directed toward nuclear physics and nuclear engineering problems. Because we have no direct design interest in this area, I foresee no potential utilization with your company at this time.

Your interest in the Agency is appreciated, and if you would care to informally discuss your company's capabilities and interests further please contact [redacted] [redacted] Special Assistant to the Director of Science and Technology, who can be reached at 351-7655.
